Trinity College Continues Moving Forward

At the time of writing this letter to our phenomenal Trinity College alumni, there were over 219,000 deaths due to COVID-19. In early March 2020, Trinity College students left for spring break. When they returned one week later, it was a very different world and educational environment. Students were directed to attend the first two days of the second half of the spring semester through an online venue. This was instituted because the United States was under a lock-down order due to the threat of the spread of COVID-19. The pandemic and its impact on the USA had become real! By summer and fall 2020 the College had transitioned back to face-to-face instruction in the laboratory and clinical settings, but many courses traditionally taught through face-to-face interaction remain online.

Since the time of national acknowledgment of the coronavirus, significant social issues have also been propelled to the forefront of our attention, as individuals and a nation. The death of George Floyd at the hands of Minneapolis police renewed the outcry for the equitable and fair treatment of black lives. In June of this year, I along with six other college presidents in our community penned an editorial to the Quad City Times describing the outrage and grief over the death of George Floyd. In this editorial, the presidents of our Quad City colleges pledged to continue to teach our students the importance of speaking out against injustice and the importance of peaceful protests as a way to raise awareness of inequity and to ultimately effect change. This is what health care professionals do. They speak up when injustices present, especially when it is the course of providing care to patients, families, and communities.

Trinity College is in a uniquely wonderful position to convey the significance and impact of both pandemics and peaceful, civil discourse. We are an institution of higher education where tremendous learning and transformation occur; and we focus on developing and introducing students to a service-oriented practice profession with the purpose of helping, not harming, others. This means Trinity College students and alumni are educated to use science, evidence, and facts to guide their practice. It also means they understand how to use empirical knowledge in a manner that realizes social good, fairness, and justice. Current events in the United States and across the world have laid bare the great responsibility that comes with educating future nurses and health sciences professionals.

So far, the year 2020 seems to have been a year of awakening. Yes, the United States, an industrialized superpower is vulnerable to the effects of a global pandemic. 2020 is also proving to be a time of social reckoning. The converging of these two issues sets the stage for a perfect storm. What has resulted, if you choose to pay attention, is a call to self-awareness and an understanding of the need for social awareness and equity. As the caption on the cover of this newsletter states, at Trinity College, we transform lives so our graduates can go out and make a difference in the world. Show your Trinity College colors. Make a difference!

Respectfully,

Tracy L. Poelvoorde, Ph.D., RN
Chancellor
Hello Alumni:

We were especially glad to welcome students back to campus this fall. It has been a pleasant change of pace to see their smiling faces and hear their vibrant voices throughout the hallways. 2020 has been a challenging year for the entire world, and our College was no exception. Our students went on spring break in March and the majority did not return for the remainder of the spring semester. Our faculty had to figure out how to change the modality of their courses with only a few days’ notice while the State of Illinois was on lockdown and clinical sites limited access in order to preserve personal protective equipment and reduce the number of people on site. I am extremely proud to report that our faculty and students proved to be incredibly resilient by adapting and overcoming every obstacle that came their way. Radiography faculty brought students on campus in groups of two to test-out for their clinical skills so they were able to meet the criteria established by NARRT to graduate. Nursing faculty adapted their clinical experiences to virtual simulations and case studies to ensure students did not fall behind and could stay on track to complete their programs. During the summer semester, our students were able to return to in-person clinicals and came to campus in groups of ten for labs. Now that we have begun the fall semester, our Radiography students are completing in-person didactic courses and labs on campus. Nursing students are completing didactic courses online and coming to campus for labs. All students are able to complete clinical in-person. Due to COVID-19, we cancelled our Scholarship Banquet in March, celebrated two Commencement ceremonies virtually, and made the difficult to decision to cancel the 2020 Alumni Banquet in September. This year has certainly been different, but Trinity College students, staff, faculty, and alumni are a determined and adaptable group. Despite the challenges 2020 has presented, health care workers have been illuminated as the heroes we’ve always known you are. Thank you for your continued dedication to your profession. I hope you all stay safe and healthy, and I look forward to celebrating with you all at the 2021 Alumni Banquet next year!

Please contact me at 309-779-7720 or Hilary.Henke@trinitycollegeqc.edu

NEW
Candace Chitwood, MSN, RN
Instructor, Nursing Department

Candace is an instructor in the Bachelor of Science in Nursing program. She started with Trinity College of Nursing & Health Sciences in August 2020. Candace has worked as a nurse in the Emergency Department at UnityPoint Health-Trinity since she graduated from Trinity College with her Bachelor of Science in Nursing degree in 2016. Candace also graduated with her Master of Science in Nursing Education from Trinity College in August 2020 and is very excited to be working as an instructor at her alma mater this year. She lives in Davenport with her husband, Adam, their three boys, Aidan (13), Liam (9), and Cillian (6), their two dogs, Eevee and Wesley, and their ball python, Grimmy Steve. In her free time, she likes to watch movies, go hiking, do yoga, and go rock climbing. She is excited for a post-pandemic world when she is able to attend concerts and baseball games with her friends! We are thrilled to have Candace on board as a faculty member!

NEW
Amy Johnson, MSN, RN
Instructor, Nursing Department

Amy is an instructor in the Bachelor of Science in Nursing program. She started with Trinity College of Nursing & Health Sciences in August 2020. Amy has been employed in health care since 2007. She started out as a lead in the medical records department at Community Health Care and has worked as a Nursing Assistant, a Registered Nurse, a Centering Nurse Coordinator, a School Nurse, and an Adjunct Nursing Instructor prior to starting with Trinity College. Amy received her Associate of Applicated Science degree in Nursing from Eastern Iowa Community College in 2011, her Bachelor of Science in Nursing degree from Western Illinois University in 2014, and her Master of Science Nurse Educator degree from Walden University in 2020. We are excited to welcome Amy to our Trinity College team!

NEW
Maria Ritter, MA, RT
Instructor, Radiography Department

Maria is an instructor in the Associate of Applied Science in Radiography program. She started with Trinity College of Nursing & Health Sciences in August 2020. Maria has been employed as a Radiologic Technologist since 2002 and is certified in Computed Tomography. She has worked in various capacities over the years including as a Lead Technologist at Genesis Medical Center in Silvis and an Imaging Manager for UnityPoint Health-Trinity. Maria received an Associate of Applied Science in Radiography degree in 2002, a Bachelor of Organizational Management degree in 2006, and a Master of Arts in Education in 2020. She has been married for 16 years to a Locomotive Engineer and they have two children, a 14-year-old girl and a 11-year-old boy. They also have a nearly 2-year-old golden doodle named Murphey. Outside of work, Maria stays busy with the various activities in which her children are involved. She enjoys learning new things and has a passion for cleaning and organizing. Welcome to the Trinity College family, Maria!
Show of Support
On May 1, 2020, Trinity College students organized a show of support for hospital staff working through COVID-19. Students gathered at UnityPoint Health-Trinity’s Rock Island Campus at dark to honk their horns and flash their headlights.

College Show of Support
Trinity College show of support for hospital staff working through COVID-19.

Finals Goodie Bags
Staff at Trinity College handed out finals goodie bags to students via curbside pick-up in May 2020.
### Sigma Theta Tau

The mission of the Sigma Theta Tau Honor Society is advancing world health and celebrating nursing excellence in scholarship, leadership, and service. Membership is by invitation to baccalaureate and graduate nursing students who demonstrate excellence in scholarship and to nurse leaders exhibiting exceptional achievements in nursing. STTI has over 135,000 active members.

The Chi Rho chapter of Sigma Theta Tau International Honor Society of Nursing hosted a live stream event for their student induction ceremony on April 29, 2020.

### Cap and Gown Pick Up

Behind the scenes images of our virtual Commencement ceremonies
Tell us about your current role.
My current job is the Clinical Specialist Critical Care Coordinator for Rock Island, Moline, and Bettendorf UnityPoint Health-Trinity hospitals. I am responsible for daily staffing, equipment, training for respiratory therapists and nurses, and training everyone on all new equipment. I am currently doing more patient care than I normally do due to COVID-19.

Tell us about your profession.
I am a Respiratory Therapist. There's a lot more to the role than people think. It's more than giving a breathing treatment or pushing buttons on a ventilator. Respiratory Therapists have to think about the therapy for the patient and how to best deliver it. We are specialized in the lungs, but the lungs affect every organ in the body, so we must have a comprehensive understanding of the entire body and know how each organ might react to various treatments or medical issues.

One positive thing that has come out of COVID is that people have figured out who Respiratory Therapists are. My whole career, people haven't known what I do as a Respiratory Therapist and now we are getting more recognition. It's been exciting for people to know what we do.

Describe the impact COVID-19 has had in your professional life?
I think it's made us more aware of our surroundings. We are hyper-aware of what we are walking into every day. I am doing more patient care now due to staffing reductions. I like being back in inpatient care. At the same time, it has been a challenge to juggle both job duties.

I think I can speak for most health care workers when I say that it has also been exhausting work both mentally and physically. Mentally, it has been a challenge to try to figure out how to help these patients, especially with something we've never seen before. We're learning as we go. Sometimes that's rough, especially when you fail a patient because you can't fix them. It's hard when the things we've always known to do aren't working. We also have more patients than we normally do. The equipment we wear to keep ourselves and our patients safe is heavy so that can be physically exhausting as well.

One of the most challenging things is that patients' families cannot be in their rooms with them at the end. It's hard to tell the family that they can't be there when their loved one passes on, so we are trying to comfort family members over the phone. As Nurses or Respiratory Therapists, we are sitting in the room with our patients when the time comes so they don't die alone. At Trinity, most rooms allow for the family to be outside the window when this happens, but it is not the same.

As Respiratory Therapists, we are the ones who have to remove the tube while the family watches from outside the window. I think there is a level of guilt associated with doing that. It's what we signed up for, but it is wearing on people. Thankfully at Trinity, we have the Employee Assistance Program available. I encourage people to use that because we must take care of ourselves too.

Tell us about your educational background.
I have a Medical Assistant degree from Hamilton Technical College, which lead me to nursing school. I went to Scott Community College for one year and decided that wasn't for me. I came to Trinity College of Nursing & Health Sciences for Respiratory Care in 2009 and graduated in 2011. In 2020, I earned my Bachelor of Science degree in Respiratory Therapy University of Cincinnati.
Tell us about your career path.
I started working as a student Respiratory Therapist in 2010 during my second semester of school. In this role, I absorbed as much knowledge as I could while I put together equipment and did other tasks assigned. I went right into a full-time position on the second shift as soon as I graduated with my degree in Respiratory Care from Trinity College. I was in that position for a year and a half, during which time I passed all my boards. Then, I was the Lead Therapist on the second shift for two years until I became the Clinical Specialist. I've been in this role for seven years now, and I love it! UnityPoint-Health Trinity's Respiratory Department is the best employment I've had in my entire life. We are like a family. We take care of each other and do whatever we need to do to help each other out.

I also work at Select Specialty Hospital in Davenport, PRN. And I'm a COVID tester at St. Ambrose University. I enjoy both of those positions as well.

Tell us about your family and life outside of work.
I am single, and I have two daughters, ages 15 and 6. I spend as much time with my kids as I can. I'm not doing much right now because I have a sense of obligation to be mindful that I could be a carrier, and I don't want to give it to anyone else.

Which college did you attend?
Trinity College of Nursing & Health Sciences

What do you do in life that inspires you?
Career-wise, I would have to say it's my patients. When I see someone who was on a ventilator and all the odds were against them, but they fought and were able to leave the hospital alive, which is inspiring. To get to take care of someone who shouldn't make it according to all book standards, but they do anyway, that is my biggest inspiration. I should note that this is something that has inspired me throughout my entire career, not just during COVID.

I recently had a patient who was in the Emergency Department and almost didn't make it. I held her hand and talked to her because while it may not seem like much to us, caring for patients in a personalized way is extremely important to them. When I came into her room to work with her later, she remembered my voice and thanked me for being so amazing with her. She had been trying to figure out who it was that was in there with her that day for the past several weeks. It was very emotional for me to know I made an impact on her. It's important to remember that when people aren't conscious, they can hear us, and what we say and how we treat them matters.

It has been said that being in the health care profession is a calling. What is your opinion on this?
It is. I can't imagine what else I would do if I didn't do this. It would be something in health care. Those of us who are called to it tend to stay in health care for a long time. I work with a Respiratory Therapist who has been there for 50 years. Another person I work with has been there for 40 years. When asked if they are going to retire, they say, “What else would I do?”

What are your plans for the future?
I want to earn my master's degree. I would love to continue with education and possibly teach somewhere.

What have been your most rewarding life experiences?
Having children was the most rewarding. I have a different perspective than some people because I see babies being born with medical issues. When I was fortunate enough to have two healthy children, it was very rewarding. Knowing that something that grows inside of you and is born healthy is inspirational. I have personally had quite a few health problems. It has been rewarding to be able to relate to patients because I can let them know I've been through this and this is how I got through. This allows me to serve as an inspiration to them.

What special recognitions and achievements have you received?
While I was at Trinity College, I received the Clinical Excellence Award. I have been featured in a few things for the Trinity Health Foundation and Trinity College. I recently graduated Cum Laude with my bachelor's degree. I am also the District Four Director for the Iowa Board of Respiratory Care.
Nursing Truly Changed My Life

One of the many joys of working in philanthropy is the opportunity to meet and befriend countless generous and fascinating people. Among my favorites is 96-year-old Rosemarie Anderson of Lombard, Illinois, a graduate of Lutheran Hospital School of Nursing (predecessor to Trinity College of Nursing & Health Sciences) and a long-time donor to Trinity Health Foundation.

Rosemarie is a “glass half full” kind of gal. She grew up very poor on a small farm in Monticello, Iowa, with a dream to someday escape to a better life. “I had only one sister and no brothers, so the heavy chores necessary to keep a farm running fell to us,” said Rosemarie.

She applied to attend Lutheran Hospital School of Nursing and began her training in 1943. In 1944, Rosemarie joined the Cadet Nurse Corps and planned to practice nursing in the Army upon graduation in 1946. “Thankfully, the war ended in 1945,” said Rosemarie. “My mom wanted me to return to practice in Monticello, but I explained I wanted to move to Chicago.”

Rosemarie’s first job was in the Men’s Medical and Surgical Wing at Passavant Memorial Hospital (predecessor to Northwestern Memorial Hospital). Her education prepared her well for her responsibilities. “Along with six of my dear friends from nursing school, I was hired and started my new career,” said Rosemarie. “We were well qualified to quickly assume our nursing duties. We even helped train some of the other nurses that started at the same time!”

Rosemarie is grateful for the high standards and rigorous training she received at Lutheran. “I loved my nursing training, so much so, I never missed one single day,” she said. “My vocation provided good income and meaningful work through which I could help others. Nursing truly changed my life.”

Sometimes the best things happen when you least expect them. On May 8, 1948, Rosemarie took a Greyhound bus from Chicago to Champaign, Illinois to visit a friend. A handsome young man sat down in the seat next to her, and they struck up a conversation. Six months later, on November 26, 1948, Rosemarie and this handsome man, Richard Anderson, were married, marking the start of 64 years together.
“Richard was the most perfect husband and father. He was bright, but also kind, patient, and he always had a smile on his face. We had a great life together,” said Rosemarie. Richard passed away in 2013 from complications due to a stroke. Today, Rosemarie is thankful she is close to her three sons and their families, which include seven grandchildren and eight great-grandchildren.

“Life is a wonderful adventure,” said Rosemarie. “I’m healthy through the pandemic. I’m able to continue to see and enjoy family and friends, with social distancing of course. I have just so very much to be thankful for.”

Since 1987, Rosemarie has shared her generosity with Trinity Health Foundation, donating annual gifts to support scholarships at Trinity College of Nursing & Health Sciences. Her experience in nursing training sparked this longstanding commitment to helping others.

“If I can help someone be as happy in nursing as I was, that means everything to me,” said Rosemarie. “I realize there are many aspiring nurses who don’t have the financial means to receive their degrees. Helping to provide scholarship assistance assures we’ll have qualified health care professionals when we need them ourselves.”

If, like Rosemarie, you are interested in supporting students attending the Trinity College of Nursing & Health Sciences, please contact me today.

Now, more than ever, a strong and thriving health care system is vital. Working together, we’re all stronger.

✓ Yes! I would like to share my story and will contact Mary today at 309.779.7613 or mary.macumber-schmidt@unitypoint.org

Mary Macumber-Schmidt
Trinity Health Foundation Director of Development

Valedictory Address

Bailee McCunn
BSN, Class of 2020

Congratulations, everyone! We made it to graduation day; a day many of us were worried would not come due to the uncertainty of 2020. Although we would rather have been all together celebrating this day, I am glad we could virtually share our accomplishments together.

First, I would like to thank everyone that has supported us in our journey to becoming nurses. Thank you to our families, friends, significant others, teachers, classmates, preceptors, and employers. You supported us through our frustrations, sleepless nights, crazy schedules, successes, and tears. You were there for us when we needed to vent about our classes, provided snacks, and support us during those late-night study sessions. You were there for us when we needed guinea pigs to learn how to listen to heart and lungs, take blood pressures, and perform head to toe assessments. Thank you! Most of all, thank you for supporting us on this crazy journey!

Entering nursing school, we knew it would be difficult. It consisted of late nights studying, lots of tests, and deadlines on top of deadlines. Our classmates quickly became our friends and the people who would get through the endless tests, clinical assignments, projects, and ATI tests with us. We learned that study sessions did not always involve studying, and our friends and classmates became the ones that we would laugh and cry with. We learned about the importance of hand hygiene, that we should never should say that we are “bored,” hand hygiene, what it means when the answer is MOST correct, hand hygiene, how incorrect medical shows are, and, most importantly, hand hygiene.

Never in our wildest imaginations did we expect that we would complete nursing school in the middle of a pandemic, but it has prepared us even more for the world of nursing. We learned that, as nurses, you have to be able to go with the flow and change direction at the drop of a hat. We found how important it is to rely on your friends and classmates. We also learned that in a profession that requires face-to-face contact and very little social distancing, how to become experts in social distancing. Case studies, simulations, and imagining patient interactions became our sources of clinical interactions for a few months. We learned that just because you cannot see the patient does not mean you cannot treat the patient.

Lastly, I want to thank our professors. Thank you to our professors who were able to adapt to all the changes and create new learning environments for us during the middle of pandemic. Thank you for getting creative in your teaching styles and creating new material for us to try. Thank you for pushing to get us back into the clinical setting prior to graduation. Thank you for providing us opportunities to grow and gain the knowledge we need to be educated nurses. Lastly, thank you for pushing us even when we did not have faith in ourselves.

Through all of the insanity that has been nursing school and 2020, congratulations to everyone here today! You have endured the endless deadlines, grown in your clinical expertise, are ready to pass the NCLEX, and start your job. As Minor Meyer Jr. once said, “Go into the world and do well. But more importantly go into the world and do good.”

Good luck with upcoming NCLEX and congratulations to the Summer 2020 graduates!
Alumni Updates

Sierra Smathers
Trinity College of Nursing & Health Sciences
Class of 2019

Sierra was awarded the DAISY award in August of 2020. She was nominated by a patient for her compassion and the high level of care the patient received. Congratulations, Sierra!

Moline Public Health Class of 1956
The Moline Public Health Class of 1956 will celebrate their 65th anniversary in 2021. The class is planning to gather at the 2021 Trinity College of Nursing & Health Sciences Alumni Banquet. The 2021 banquet is scheduled for Saturday, September 25, 2021 at CityView Celebrations in Moline, IL.

Jo-Ellyn Platt Elliot
Franciscan Hospital School of Nursing Class of 1975

On September 15, 2020, Trinity Nursing Honor Guard paid tribute to a very dedicated nurse during a memorial service at St. Pius X Catholic Church in Rock Island.

Jenise Bollivar Jones (FSN ’75) was recognized as being an individual who dedicated her life to the profession of nursing. Her husband, Dave, choose to honor Jenise at the same church where she received her nursing diploma (1975) and where they were married (1976). Jenise passed away on June 9, 2020, in Clearwater, Florida.

Jenise's husband, Dave, son, Kyle, and her sister, Jan Rosene, shared their memories as a family. While Jenise's roommate, Lynn Theobald Meyer (FSN ‘75), and ‘Big Sis’, Kathy Behnken (FSN ’74) retold nursing school experiences. Elizabeth Banse Howe, Kathy Gebhart Clasen, Robin Hansen McCauley, Lynn Hull Rempe, Jo-Ellyn Platt Elliott, Janice Sholl, Lynn Theobald Meyer, and Kathy Behnken were able to attend this tribute for our classmate. Jenise was remembered for her big smile as stories about dorm life during nursing school were shared. Living together for two years made us feel as though we were sisters (along with one brother) in one big family. And like most families, these bonds cannot be broken by either time or distance. Every nurse in attendance was given a white rose to signify the nurse's devotion to the profession. While together, we also remembered another classmate, Mary Borgonjon Knight who passed away in July. It was with deep sadness that we had to say good-bye to our sisters, Jenise and Mary. May they both rest in peace and may those left behind find comfort in knowing that we will one day be together in God's presence.

Lutheran Hospital School for Nurses Class of 1980
Lutheran Hospital School for Nurses celebrated their 40th reunion via Zoom in August. Approximately 10 members of the class were able to join. The group had a second Zoom meeting in September and are planning another Zoom meeting in October. They group has found this to be a wonderful way to stay in touch during the COVID-19 pandemic and encourages other classes to consider doing the same. If any other members from LHSN-Class of 1980 are interested in joining, please contact Jan Eyer at 919-624-5029.

The UnityPoint Health-Trinity Nursing Honor Guard recognizes individuals who have dedicated their lives to the profession of nursing.

Members of the Nursing Honor Guard consider it a privilege to participate in the memorial services of their fellow nurses. Who better deserves a final farewell than nurses who have dedicated their lives to caring for others in times of need? Nursing is a profession steeped in tradition. We use these traditions as symbols for those who have given so much and who have served so well.

Services of the Nursing Honor Guard are available at the family’s request for any active or retired registered nurse or licensed practical nurse.

To request the presence of the UnityPoint Health-Trinity Nursing Honor Guard, please call (309) 779-5000.
