

ASSOCIATE OF APPLIED SCIENCE RADIOGRAPHY

PROGRAM GUIDE

Trinity College of Nursing
& Health Sciences
UnityPoint Health

Overview

The Associate of Applied Science in Radiography program involves two years of study combining general education courses with classroom and clinical Radiography courses. This program prepares beginning radiographers to function as skilled imaging professionals in entry-level positions.

The Radiologic Technologist applies knowledge of anatomy, physiology, positioning, radiographic technique, radiation biology, and protection with general education in the performance of imaging responsibilities. General education coursework promotes the practice of oral and written communication skills, the use of mathematics, and utilization of human and social awareness.

After completion of the Radiography program, the graduate is eligible to apply for the American Registry of Radiologic Technology (ARRT) certification exam to qualify for practice as a Registered Technologist in Radiography RT(R).
